## My 5Ds:

- **Color** : A quality of an object which is caused due to the light being reflected or emitted by this object.
- **Emotion** : A natural instinctive state of mind deriving from one's circumstances, mood, or relationships with others.
- **Connection** : A relationship in which a person, thing, or idea is linked or associated with something else.
- **Music** : The arrangement of sound to create some combination of form, harmony, melody, rhythm, or otherwise expressive content.
- **Memory** : The power to retain and recall information and past experiences.

## Reflection:

This exercise has significantly expanded my understanding of experience design by encouraging me to explore how personal dimensions shape interactions and perceptions. Before engaging in this project, I had a limited perspective on what dimensions could represent. Then I explored the definition of dimension in the dictionary and began reflecting on how it might relate to different themes in my life. I was amazed to discover that dimensions could be deeply connected to my personal experiences. The five dimensions I chose are Color, Emotion, Music, Connection, and Memory, it represents key aspects of how I perceive and experience the world. Color represents the vibrancy of my life. From the warmth of bright reds to the calmness of soft blues, color encapsulates the variety and richness of my feelings and experiences. Emotion reflects my personality and how quickly my feelings shift. I often feel emotions intensely, but they pass as quickly as they arise. Music, for me, is not just sound, it represents moments of solitude and peace. Connection symbolizes the bonds I share with friends, emphasizing the importance of relationships in shaping who I am. Memory focuses on my journey since moving to Boston, which is a transformative chapter in my life. These experiences have shaped my growth and independence. This process helped me understand that experience design is not just about creating objects or spaces but also about creating interactions that resonate emotionally.
